

Digital youth work practice implementation: practice reflection tool

This form is meant to be a tool to reflect on new practices, approaches or latest information on digital youth work topics. It is intended as a tool to reflect on the subject from the viewpoint of your work, so freely write down any thoughts as narrowly or in-depth as you see necessary. This form can be used in events, training courses or any other suitable setting where new practices are presented. You are also free to modify it to suit your use case, according to the guidelines of the license below.

We have based the structure of this tool based on data from the Screenagers research report (2016) and the final report “Developing digital youth work” of the EU expert group on digitalisation and youth. It has been further revised and rebuilt during the Digital youth work project in 2019.

These training materials have been developed as part of the ‘Digital Youth Work’ project, a strategic partnership between 7 organisations across Europe, to build the capacity of the youth work sector to deliver high quality youth work in a digital age. They are based on training needs for practitioners identified by the [EU expert group on digitalisation and youth's 2018 report](#).

The resources from all partners are available at www.digitallyouthwork.eu. The project has been funded by Erasmus+.

This work by [Verke](#) was developed in the project "[Digitally Agile Youth Work](#)" with funding from Erasmus+. New youth work practice / approach

Fill in the topic here

How would this practice / approach benefit my organisation?

How would this practice / approach benefit the young people we work with?

What kind of competencies would we need for this to work?

What kind of hardware, software or facilities would we need? (Minimum / best case scenario)

How about other resources? (Time, worker resources etc.)

<p>How much would doing this approximately cost?</p>	<p>Are there risks involved for young people, the organization or you? Could something prevent this from working?</p>
<p>Who else do you need to involve in planning this?</p>	<p>Where can you start in implementing this? What will you do first thing tomorrow?</p>

Notes:
